- Advanced high-density array GPR
- GPR post processing
- EML utility detection
- 2D and 3D CAD and modelling
- Digital Chamber asset data
- Site Reconnaissance
- Desktop Utility Record Searches
- Verification by Excavation
- Survey Capture by Total Station and/or GNSS
- Huge experience on all types of sites including complex and traffic sensitive city centre locations

Our CEO, co wrote PAS128:2014 for BSI and ICE, so we know the PAS128 specification in great detail.

We are able to assist you with any queries you may have regarding specification verses survey deliverables.
