

## **John Robinson, CEO FCInstCES**

### **Skills and Specialisations:**

- Co-Author of PAS128:2014
- Member of Steering Group for PAS256:2017
- Health and Safety (IOSH)
- 37+ years' experience in the utilities sector developing, managing and directing projects Worldwide
- Project Management

John Robinson has been heavily involved in the utility survey and mapping industry for over 37 years. Within that time, he has worked extensively in the UK but also worldwide as a surveyor, project manager, and consultant and Director.

John is active in modernising the UK survey industry. When the British Standards Institution and Institute of Civils Engineers decided to create the UK's first robust utility survey specification, John was asked to be one of the four authors as an industry expert to write this specification. Subsequently PAS128:2014 Specification for utility detection, verification and location was published with much acclaim and has since become the industry standard specification.

John was also a Steering Group member for PAS 256:2017 Buried assets. Capturing, recording, maintaining and sharing of location information and data. Code of practice

John Robinson Associates have unrivalled knowledge of underground detection techniques such as ground penetrating radar (including multi-array) post processing, electromagnetic methodologies, CCTV and vacuum excavation.
